# CULTURE MEME COMMUNITY UTILITY

A Revolution

- Core Values
- Moontography: Extreme Utility & Fundamentals
- ok.let's.go: Culture, Community, and Rewards
- Coalescing Two Ecosystems
- Fundamentals: Creating a Well-Oiled Machine
- Marketing, Expansion, and Growth
- Cross Community Interoperability & Partnership

# CORE VALUES

## ETHICS

Make decisions and execute with the highest standards of ethics and morals in the base of said decision making and execution.

## HONESTY

Transparency and communicating the truth is the most powerful thing one can do in life. As a business, you gain trust amongst your investors by being completely honest along the way.

## QUALITY

Execute and build to the top most quality through standardized processes, training, and repetition.

# MOONTOGRAPHY: THE GENESIS

## Fundamentals & Utility

The beginning of this journey began with Moontography, an idea, plan, and execution built on top of the core tenant of utility and fundamentals. For six months the Moontography project and platform have seen extraordinary growth in both functionality and usage amongst both project and user adoption. This has and will remain a core tenant to this revolution moving forward.

### Moontography Dapps Live

- Atomic Swap/Bridging as a Service
- Farming as a Service (ERC-20 and ERC-721)
- Airdropper (ERC-20 and ERC-721)
- Raffle/Lottery (ERC-20 and ERC-721)
- Trusted Timestamping
- On Chain Password Management

OK.LET'S.GO

## CULTURE & MEME

It has been proven out with several implementations and projects that building an identity within the project brand that embodies a foundational culture others want to be apart of is extremely important. Meme's have also been shown to be very powerful helping others feel they belong and want to be apart of a movement of sorts. With OKLG we have attempted to build this into one project, and will continue building this into our merged ecosystems.

## COMMUNITY

One of the most powerful and impactful things you can provide someone is a place they feel welcome and belong. Both the MTGY and OKLG communities have built such a community, and we feel merging to the two will create a super community that anyone in crypto will want to be apart of.

## REWARDS & GAMIFICATION

OKLG has some very innovative and well thought through tokenomics to support a lucrative rewards system for holders and dynamic trading fee exclusion. The mechanisms behind said functionality have not been used before in the same way they are being used in OKLG, and with both the rewards and future plans for building games, it allows people to enjoy and be rewarded for being apart of the MTGY/OKLG ecosystem.

# INNOVATIVE TOKENOMICS

## 2% NATIVE BNB/ETH REWARDS

We accumulate a pool of native tokens (BNB/ETH) that you can currently claim every 12 hours after buying/selling/transferring OKLG. Your rewards do not accumulate, so be sure to claim and engage every 12 hours. This is by design to encourage community engagement long term.

## 4% TREASURY

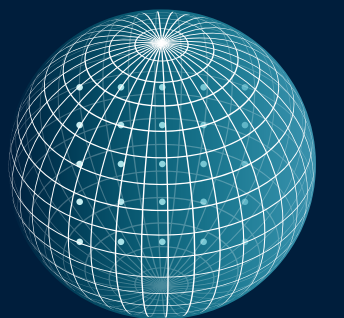

Funds current and future marketing efforts to get the word out about the project and R&D. This is one of the most vital sources of revenue to keep the marketing train humming so we can grow to the places we want to get to as a community and ecosystem.

## 2% REFLECTIONS/REDISTRIBUTION

Every buy/sell order rewards loyal OKLG holders with passive and compounding rewards dropped in your wallet automatically in the form of more OKLG!

## 2% DYNAMIC BUYBACK [& BURN]

One of the most exciting features on the contract, we by default buyback and burn OKLG. But we can buyback any token listed in Uniswap V2 or Pancakeswap, and send it not only to the burn address but any address we want! This is a great contest winning mechanism in addition to incentive for marketing partners.

# EXISTING & NEW INVESTORS

007

## New investors: buy OKLG, not MTGY

*Nothing in this slide constitutes financial advice, but simply information only.*

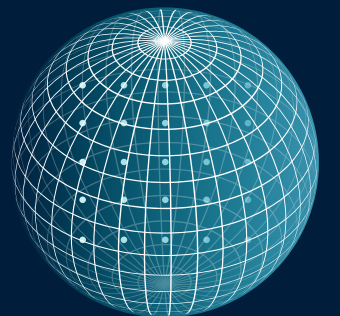

### MTGY HOLDERS

#### **SWAP YOUR MTGY FOR OKLG IN THE MOONTOGRAPHY PLATFORM.**

Currently there is a fixed ratio to swap your MTGY for OKLG, but we will potentially adjust this ratio in the future in order to prevent large deviations and arbitrage opportunities that could impact the OKLG price too quickly. We are also removing all MTGY liquidity and migrating to the OKLG ecosystem as soon as possible.

### OKLG HOLDERS

Keep and collect your OKLG reflections and native rewards! The OKLG token will be the token we use for the ecosystem moving forward. Because of its unique features, revenue model, innovative rewards and buyback, and current growth we believe this will be the most sustainable token to move forward with the merging of the ecosystem.

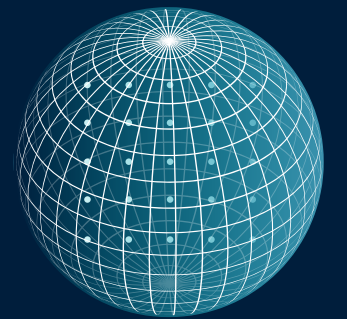

## THE PLAN

The innovative tokenomics and treasury support of the OKLG token makes it the more sustainable coin to use moving forward. In saying that, we wanted to support a dead simple interface to swap MTGY tokens for OKLG. We did not want to penalize MTGY holders who may not be able to swap immediately, so we are pegging a ratio of being able to migrate MTGY to OKLG, which can be swapped in the Moontography interface.

## THE EXECUTION

MTGY holders, ensure your tokens are on BSC, and bridge them using Moontography bridges if need be. Then navigate to <https://app.moontography.com/#/mtgy-oklg-swap> to swap your MTGY for OKLG.

MOONTOGRAPHY | OK. LETS. GO.

# FUNDAMENTALS & UTILITY

Trusted Timestamping  
Farming/Staking as a Service

On chain password management  
Airdropper

Atomic Swap/Bridging as a Service  
Raffler/Lottery as a Service

## FIAT ON RAMP

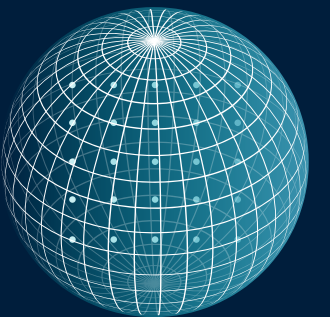

The biggest barrier to entry to crypto is understanding blockchain and how to get money from bank account to your target project. We will work to fix this.

## DTAX: INSIGHTS

An already planned roadmap item, we still plan on building a decentralized reporting/insights engine to deliver meaningful, reportable info on wallet transactions and P&L along the way.

## CROSS-CHAIN LAUNCHPAD

We already have to infrastructure with atomic swap as a service to support cross chain tokens, why not support launching cross chain at the start while we're at it!

**NFTs for rewards boosters/trade fee exclusion, and MUCH MUCH more to come!!**

# OKLG TOKEN GENERATOR

## RUG FREE PROJECT CREATION

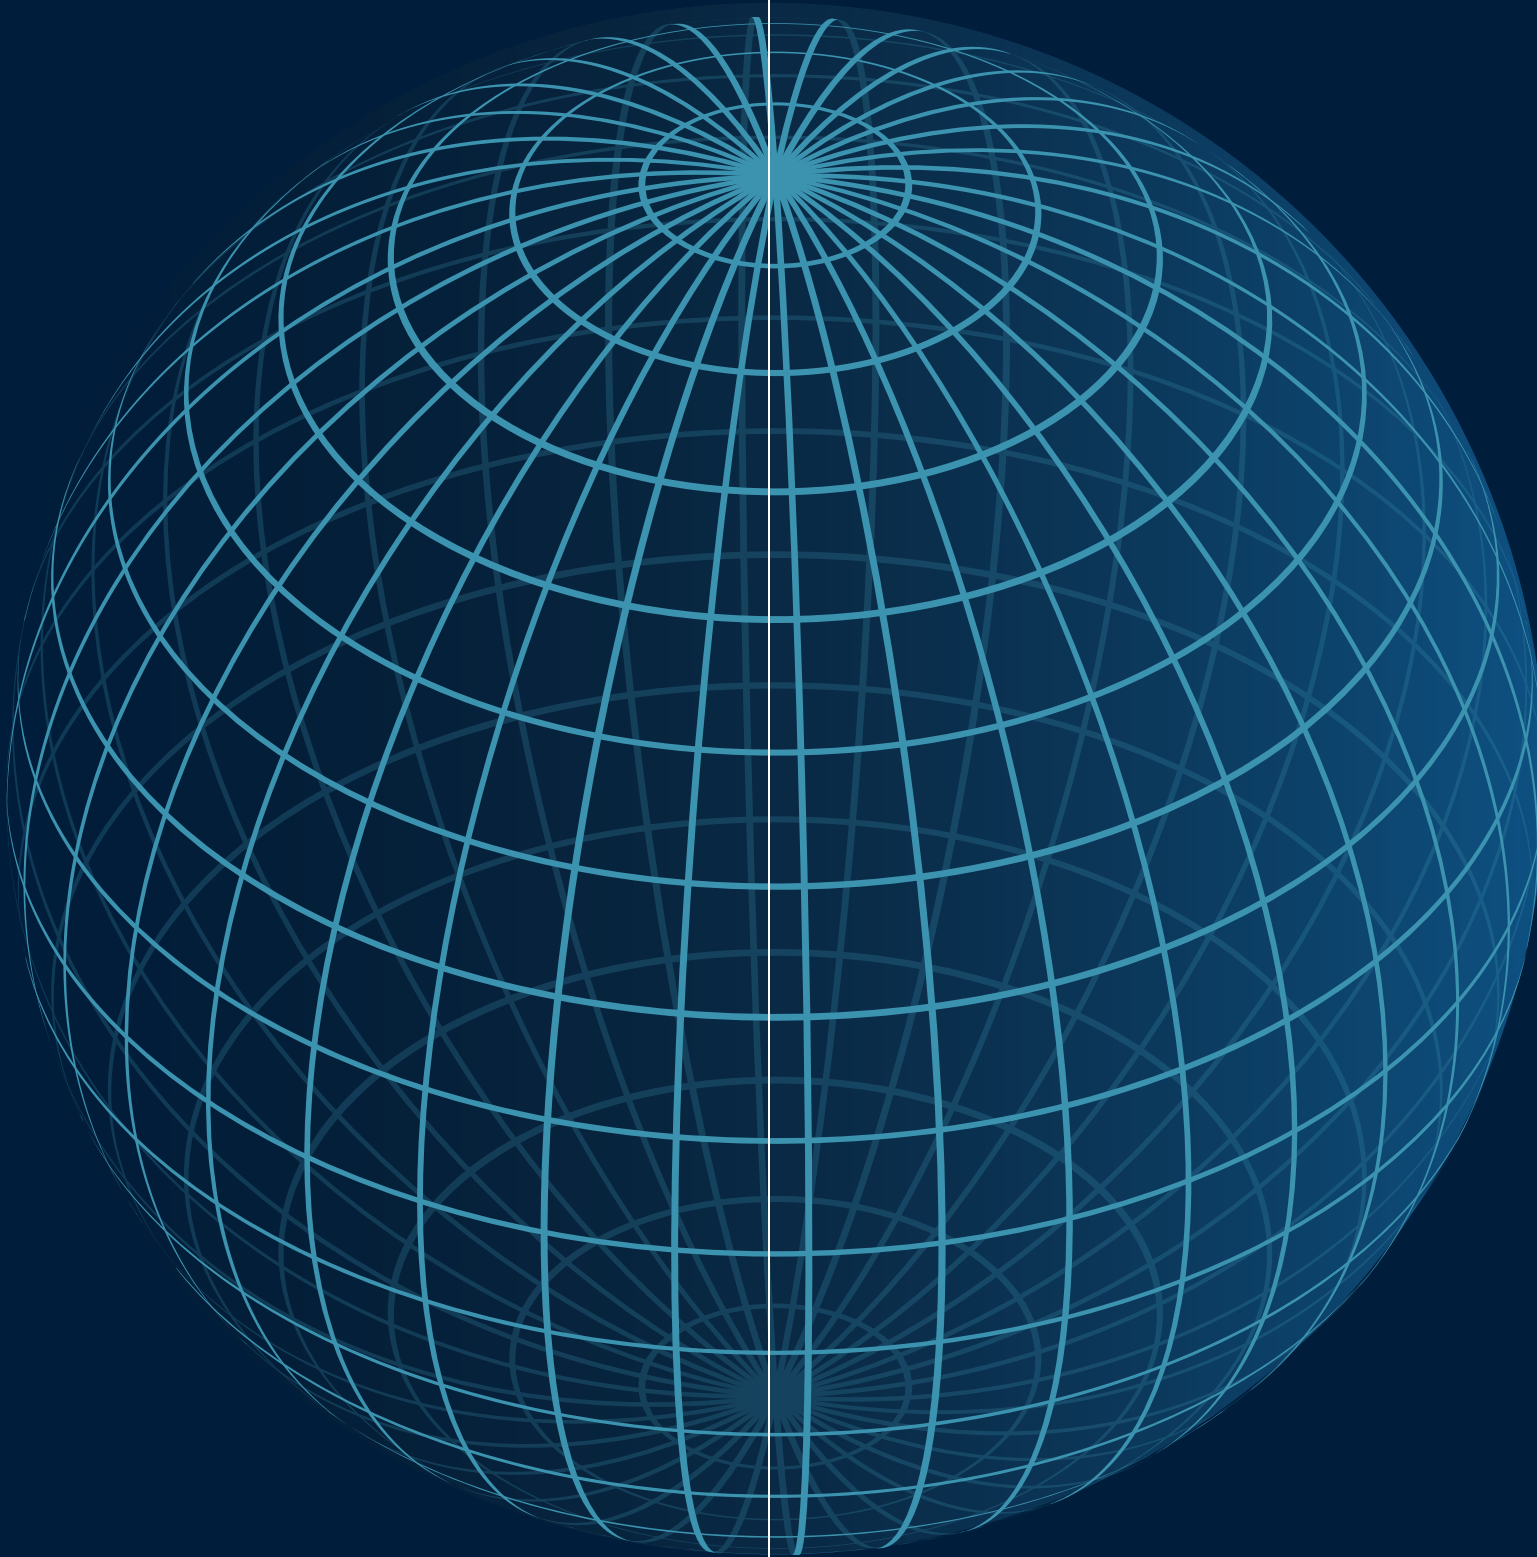

One of the inspirations for the creation of OKLG was in response to the recent uptick in rug pulls in crypto. We wanted to create a way to automate token creation for project creators, that ensures it will be a true fair launch, and that the OKLG ecosystem can benefit from as well. With our vision of a token generator, we would implement a permanent and perpetual buy/sell tax that would be sent directly to the OKLG treasury to be used for marketing, R&D, and buybacks. We would supply initial LP for the token and add 100% of tokens to LP for a truly fair launch for this project.

# UTILITY

## OKLG DRIVEN UTILITY

Currently in the moontography platform every dapp, product, and service we offer is driven by and paid for by the MTGY token. We will be evaluating and adjusting the current pricing model for every product, and in the future all products and services will be paid for using native token (BNB/ETH) and market bought into OKLG or paid for using OKLG directly.

MOONTOGRAPHY | OK. LETS. GO.

## OKLG-Powered Consulting

A lot of time the last few months has been assisting projects through contract R&D, helping projects raise money for liquidity to enable launching cross chain, assisting with bridging, and other general consultation. There will be a formal consulting process built, and all revenue generated from said services will require the project(s) to market buy OKLG and pay us with it, in which we will use it to burn or leverage in other capacities. The primary thing to note is, this is a direct way we will be supporting the OKLG token floor price through consulting.

# GROWTH & EXPANSION

## Marketing and Growth Planning

1

Revenue through both subscription models used by customers for currently launched dapps in addition to the four percent trading tax to fund the treasury have positioned us well to execute on future marketing plans.

2

We will continue to explore and bring onboard strategic, passionate, and meaningful partners. We are already in talks with several highly influential individuals in crypto, including celebrities and more will be announced later.

3

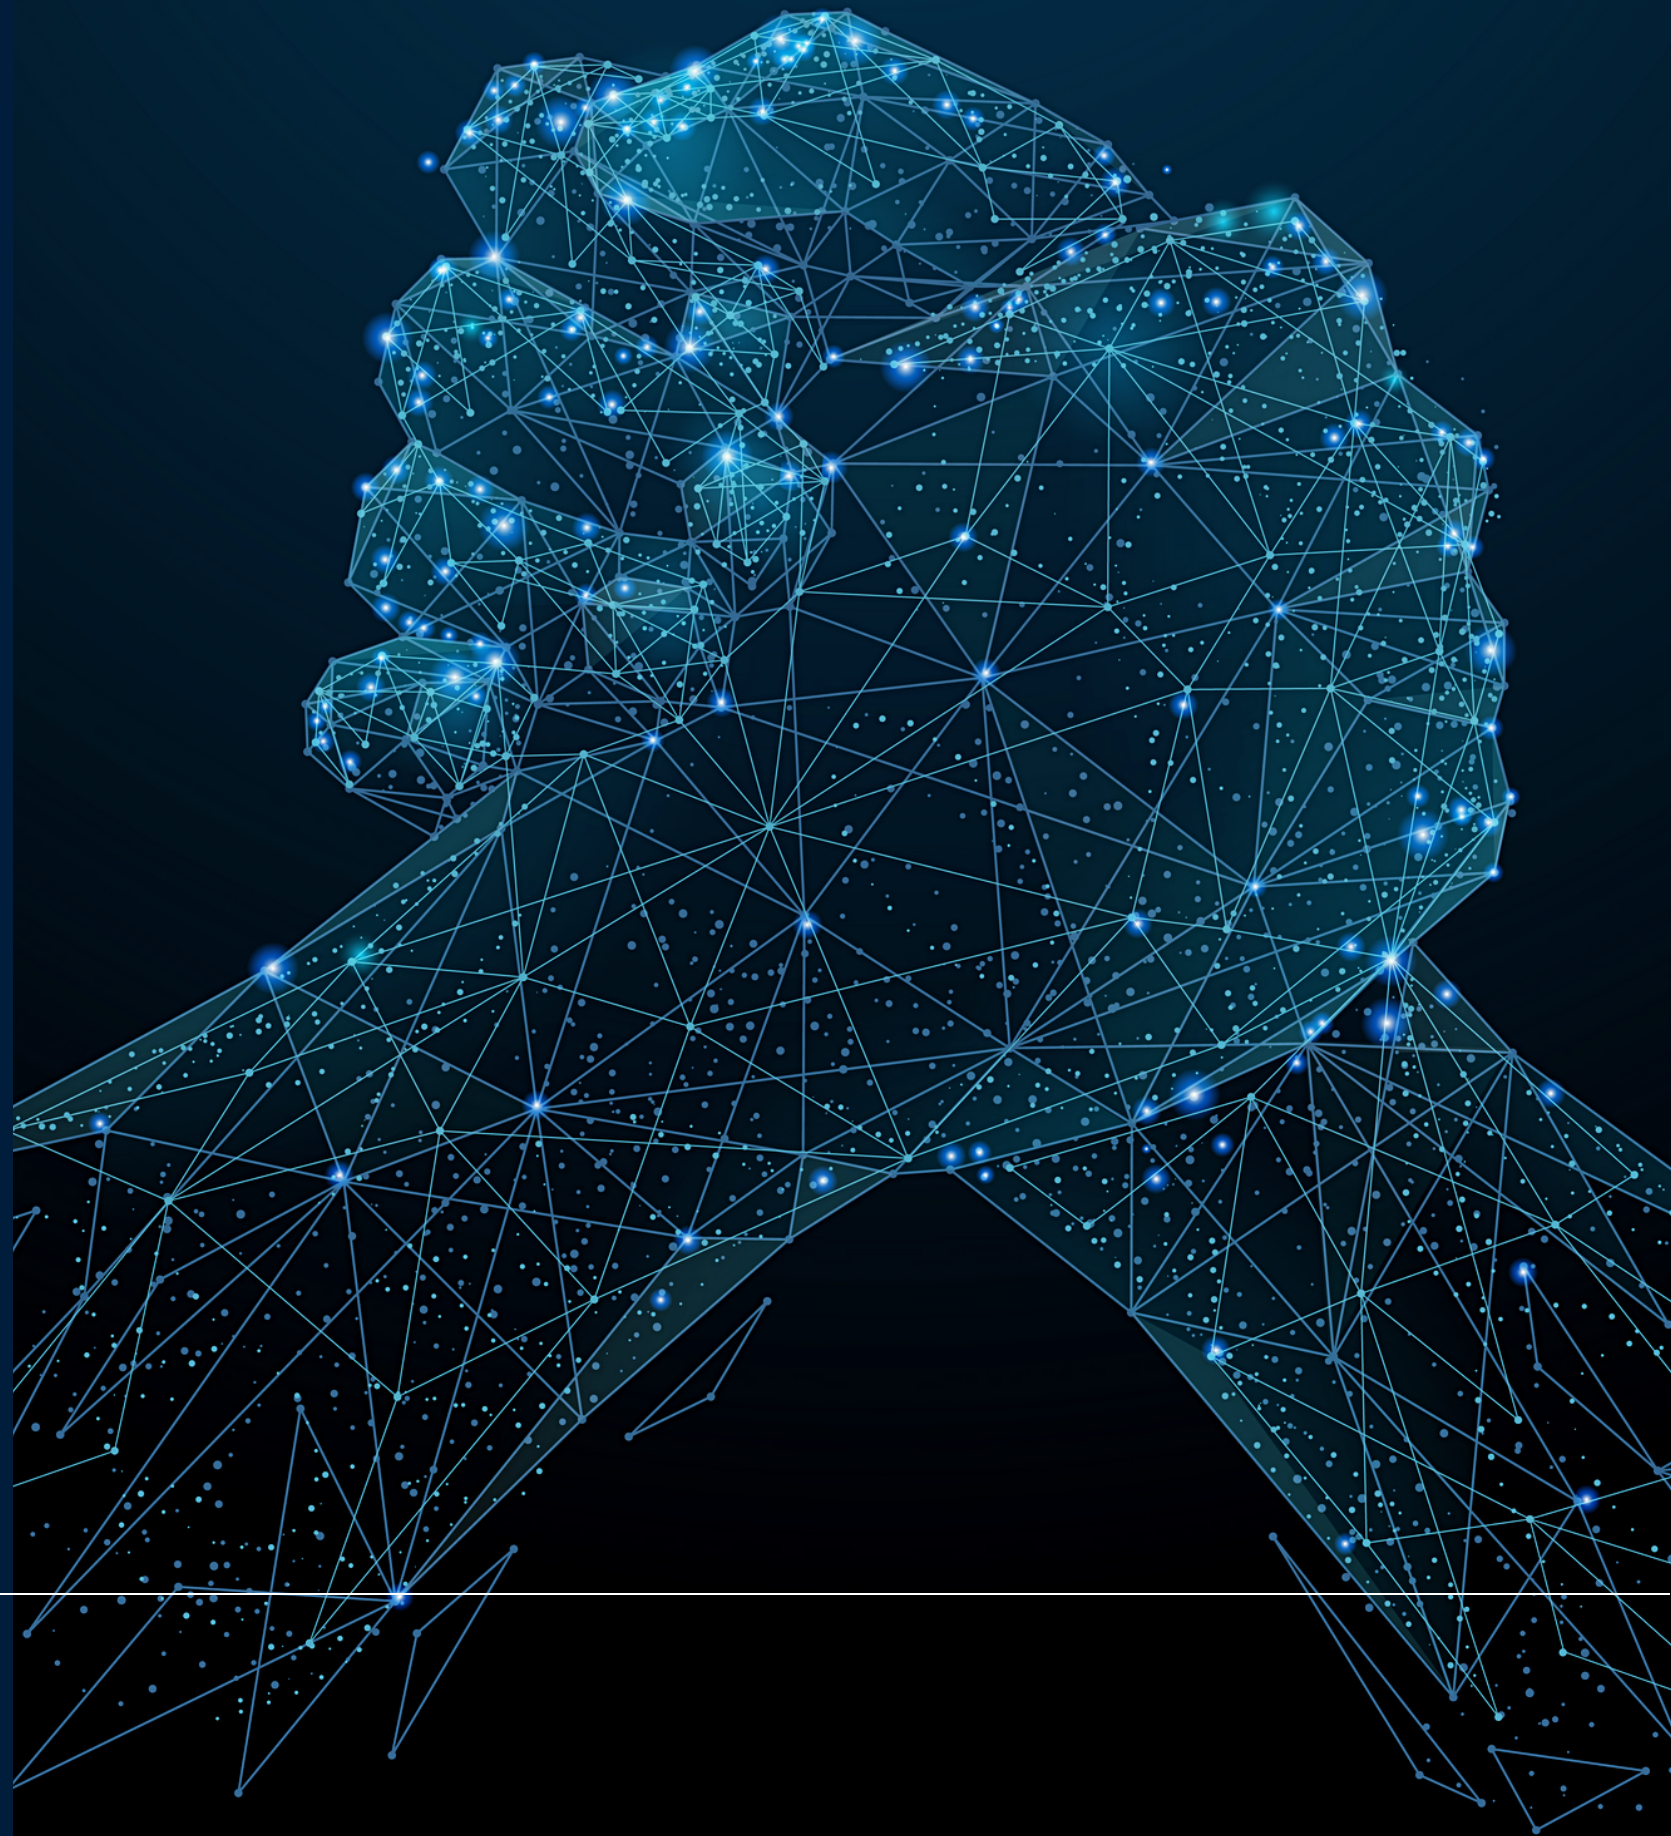

As the project and brand grows, we will build a bigger and broader team to support all aspects from strategic marketing, accounting, product, and beyond. More of what this looks like to come!

# CROSS COMMUNITY INTEROPERABILITY

## Bringing Together Communities

Through OKLG's unique tokenomics, reward structure, and dynamic buyback we have the ability and desire to come together with other projects and create lasting and meaningful relationships that can build each other up. Too often do crypto communities & projects become maximalists where their thinking is molded into an unhealthy "only this project" way of thinking, and we want to get rid of this bad energy and bring people together.

# A REVOLUTION

Be prepared to join and be apart of the most rewarding and fulfilling journey of your lives! We plan to change the world for the better through decentralization, community, meme, culture, and utility, and are glad you're here to join us along the way!
